ROZINA SALEEM

FULL STACK DEVELOPER | MERN STACK | AI-ENABLED WEB APPLICATIONS

Email | GitHub | IG | LinkedIn | X

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building production-ready web applications using the MERN stack. Skilled in developing responsive frontends, RESTful APIs, secure authentication systems, and complete e-commerce solutions. Strong command of JavaScript, React.js, Node.js, Express.js, MongoDB, Next.js, and modern frontend tooling. Proven ability to implement JWT and Google OAuth authentication, Redis caching, ImageKit media delivery, transactional email workflows, and AI/LLM-powered search and chatbot features. Currently practicing AI prompt engineering and Progressive Web App (PWA) fundamentals, with 80+ data structures and algorithms problems solved. Permanent U.S. resident — no employer visa sponsorship required.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3 Frontend: React.js, Next.js, Tailwind CSS, ShadCN UI, Redux Toolkit, responsive web design Backend & APIs: Node.js, Express.js, RESTful APIs, Express Validator, JWT authentication, OAuth 2.0 / Google Auth, Nodemailer Databases & Performance: MongoDB, Redis caching, Pinecone vector database, API optimization, load balancing (project experience) AI / LLM: RAG (Retrieval-Augmented Generation), LLM-powered search and chatbots, AI prompt engineering (learning/practice) Web Application Concepts: Progressive Web Apps (PWA) fundamentals (learning/practice), responsive design, session management Payments & Media: Payment/order-flow integration, ImageKit.io, image upload and CDN delivery Tools & Workflow: Git, GitHub, Postman, Figma, WordPress, Agile/Scrum Problem Solving: Data Structures & Algorithms (DSA); 80+ problems solved

SELECTED PROJECTS FYNIX

Full-Stack E-Commerce Platform | MERN Stack / Next.js • Built e-commerce functionality including product catalog, cart, checkout, payment/order flow, and an admin dashboard. • Implemented JWT authentication and Google OAuth for user login and session management. • Developed RESTful APIs with Express.js and request validation using Express Validator. • Integrated Redis caching and configured load balancing across Node.js instances as part of the project architecture. • Integrated ImageKit.io for image upload, transformation, and CDN delivery; configured Nodemailer for transactional notifications. • Added RAG-based LLM functionality with Pinecone vector search for AI-powered product search and customer-support chatbot features.
School Management System | MERN Stack • Developed student, teacher, and class management modules with role-based access control. • Implemented authentication and authorization workflows using JWT. WordPress Business Websites | WordPress • Built responsive business websites using custom themes and plugins, with SEO-friendly layouts. Figma UI/UX Designs | Figma / React / Next.js • Created wireframes and interactive prototypes and translated designs into React and Next.js interfaces.

EDUCATION & TRAINING MERN

Stack Development Program | Sheryians Coding School Training in full-stack MERN development, REST API design, authentication, and modern deployment practices. Education: FA / Intermediate — confirm exact credential, institution, and completion details before submitting. **ADDITIONAL INFORMATION** Work Authorization: U.S. Permanent Resident (Green Card); no visa sponsorship required. Target Roles: Junior Full Stack Developer, MERN Stack Developer, Frontend Developer, Entry-Level Software Developer.
